

ERP / FINTECH / AI / CUSTOM SOFTWARE

Complexity, engineered into advantage.

Company profile and capability statement

ADVANCED MECHANISM SOLUTIONS

AMMAN / JORDAN / 2026

LOCAL UNDERSTANDING. GLOBAL AMBITION.

Dependable technology, shaped around real operations.

ADV-MECH is an Amman-based technology company focused on enterprise platforms that remain secure, supportable and ready to evolve across their lifecycle.

MISSION

Deliver dependable technology that improves client operations and remains supportable across its lifecycle.

VISION

Build lasting partnerships through sound architecture, local understanding and accountable delivery.

01

Integrity

Clear commitments

02

Accountability

Visible ownership

03

Learning

Disciplined evolution

04

Practical innovation

Useful progress

ONE DIGITAL CORE

ERP, Fintech, AI and custom software - connected by design.

We connect business context, architecture, product engineering, quality and operations so that each capability strengthens the whole platform.

01

Enterprise ERP

Finance, HCM, procurement, assets, operations and governed analytics.

02

Fintech Engineering

Secure transaction journeys, payments, reconciliation, risk and integration.

03

AI & Automation

Knowledge intelligence, decision support and governed process automation.

04

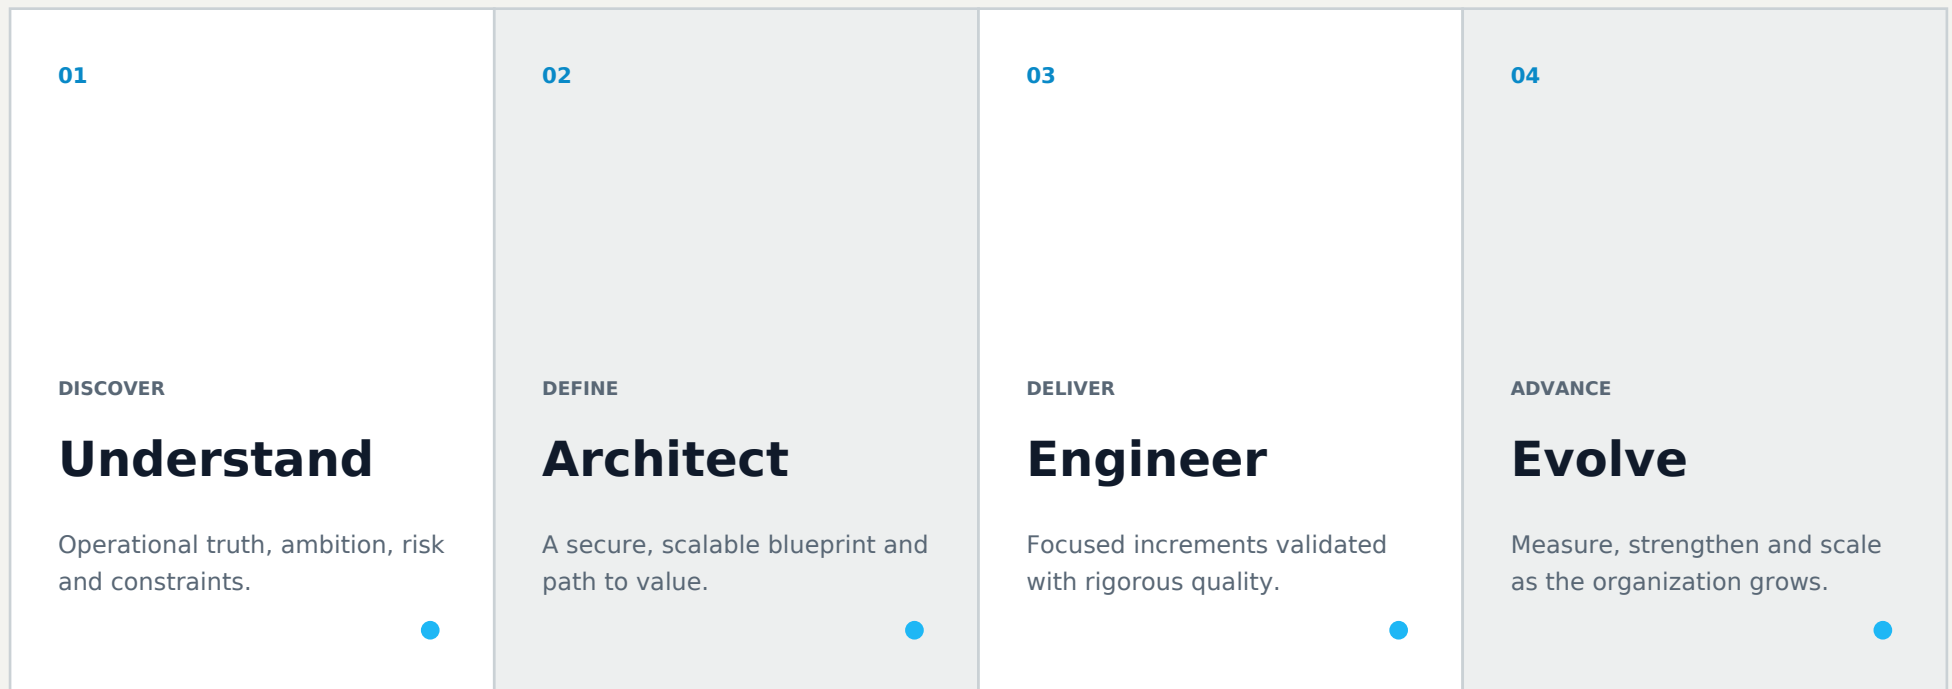

Custom Software

Mission-critical web, mobile, integration and modernization platforms.

FROM FIRST PRINCIPLE TO LASTING ADVANTAGE

Context stays connected at every stage.

Senior technical and business decisions remain clear, progress stays visible and quality compounds across one accountable delivery model.

PROFESSIONALISM IS A VERIFIABLE WAY OF WORKING

Trust, designed into every decision and deliverable.

The objective is not just to launch software, but to leave behind an understandable platform, governed decisions and a foundation that can continue to evolve.

01 Architecture before build

System boundaries, integrations and risks are explicit before implementation.

02 Security within the design

Identity, authorization, auditability and data protection begin in architecture.

03 Testable delivery

Requirements, acceptance criteria and quality evidence stay connected.

04 Clear ownership

Decisions, responsibilities, changes and knowledge transfer remain traceable.

SECTORS

Financial Services / Enterprise / Public Sector / Telecommunications / Industrial & Logistics

Build today what your business becomes **next.**

Start with the operational challenge, the outcome you need and the constraints that matter. We will begin with a practical conversation about the right next step.
